

LUIS LOPEZ, FINE ARTIST & SCULPTOR

ARTIST STATEMENT

My life embraces a life-long affair with the arts. The creative process awakens and invigorates the vital energy to answer the questions that can only be answered through art. I try to maintain a dialogue within myself to find a balance in a world full of challenges. I always reevaluate the events that affect my principles and appreciation for humankind in this vast universe. My art chronicles the memories & interpretations of my journey anchored in my rich background.

Born in Mexico and naturalized as a United States citizen, I can leverage the cultural, social, and imaginative power of my multiculturalism. I am always looking to honor my roots while at the same time embracing diversity.

As a professional artist, for over 30 years, my creative vigor has led to establishing a history of numerous commissions, acquisitions, and exhibitions. As my reputation flourished, my art continued to diversify. I chose to explore and push the boundaries of creativity. My variety of work communicates my constant mobility and strong desire to know and understand the world. I create art that is aesthetic, engaging, and culturally empowering. My lifelong dedication and production of art have led me to create 3-dimensional depictions of structure and design, enabling me to transfer my artwork to public art in the form of several sculptures.
